TAG-Personalized Car Finance Advisor

Name: Gireeshwar Chowdary Gangarapu

Student ID: 02081655

Email: Gireeshwarchowdary_Gangarapu@student.uml.edu

What Am I Proud about:

I created a car inquiry website that includes several questions about the user and their automobile expectations. This enhanced user form page not only collects more precise vehicle information, but it also provides a thorough insight of the user's preferences. In addition, I've been looking into several backend integration solutions to improve the functionality of the inquiry page. Potential tools for storing and analyzing the acquired data include React, a strong JavaScript library for developing user interfaces, and XAMPP, a robust solution for managing server environments. This combination guarantees smooth data handling and a pleasant user experience. Also, I've been researching the use of APIs to improve comparative search results. Users will be able to receive individualized recommendations based on their tastes as a result of this.

Details:

completed user preference inquiry page, homepage and about pages.

Next Steps:

- Implementing search functionality and visual comparison functionality to compare the cost of buy or rent car.
- Data base to store the data i.e. details of the car
