

## **Project Progress Report -3**

### **TAG-Personalized Car Finance Advisor**

Name: Gireeshwar Chowdary Gangarapu

Student ID: 02081655

Email: Gireeshwarchowdary\_Gangarapu@student.uml.edu

#### **What Am I Proud about:**

In the past week, significant progress was made on the car leasing app project. Data collection and loading were successfully completed for 200 car models, including details such as car model, type, mileage, and features. The information is now stored in Firebase, ready to be efficiently loaded based on user selection. Additionally, key functionalities were implemented, including a subscribe feature for users to stay updated on car leasing options. The app now boasts a seamless contact system, enhancing user engagement and facilitating communication.

#### **Details:**

We have successfully developed key sections of the project, including the User Preference Inquiry Page, Homepage, and About Pages. These components collectively empower users to customize their car model preferences and gain insights into our platform's purpose and background. The integration of Firebase for data storage signifies a commitment to providing users with real-time, dynamic information on car models and pricing details. By completing the data collection and loading process, we have laid a solid foundation for a platform that is not only informative but also responsive to users' evolving preferences.

#### **Next Steps:**

- Visual comparison of car details
- Extra features
