Student ID: 02081655

Email: Gireeshwarchowdary_Gangarapu@student.uml.edu

What Am I Proud about:

The addition of a user-friendly "Browse All Cars" feature stands out as a major enhancement. This new functionality allows users to effortlessly explore the entire range of cars we offer. Leveraging Firebase, we've efficiently retrieved and presented comprehensive data about each car, ensuring users have access to detailed information, and making their browsing experience more informative. Furthermore, our progress extends to the development of two crucial sections within our app, the Weekly Recommendations and FAQ pages. The introduction of weekly recommendations adds a dynamic and personalized dimension to our application, providing users with insightful suggestions that align with their preferences or needs. This feature not only enhances user engagement but also contributes to a more user-centric experience. Simultaneously, the incorporation of a Frequently Asked Questions (FAQ) section streamlines user interactions with the app.

Details:

Important project elements, such as the Homepage, About Pages, and User Preference Inquiry Page, have been developed successfully. Also, now our app has user-friendly features like browsing all the options, FAQ, and weekly recommendations. Also, our app has a feature to contact for a user seamless experience.

NextStep:

Small CSS updates to the existing development for the final presentation.
